Tectona Teak Wood and Brass Bollard

TECTONA TEAK WOOD AND BRASS BOLLARD

Product Code: SFD5814

Dots

PRODUCT DESCRIPTION

This lovely 'Tectona' teak wooden path light has an elegant and very natural look. Further traditional charm is added to this smooth bollard with a polished mounting base and six polished brass louvers surrounding the white polycarbonate diffuser. This is a great decorative touch but also adds further protection to the bulb and conceals the head's fixing bolts. The Tectona is 700mm tall with an 80mm diameter, and looks impressive in any setting; especially gardens where the natural atmosphere can be enhanced by outdoor lighting.
