PRODUCT DESCRIPTION

Our 139mm Diameter Titan Steel Bollard is made from 5mm gauge steel, galvanised for durability, and can be powder coated* in your choice of colour. Hazard banding strips are also available for extra night-time visibility.

The standard cap is a welded flat top, but alternatives such as domed, semi-domed, and mitred tops are available for a small extra cost. Simply contact our team for advice.

For added security, consider the Titan Reinforced Steel Bollard with Anti-Ram protection. If you're looking for a full range of bollards or a complete street furniture package, our team can help put together the right solution for your project.

*Powder coating will require a longer lead time.
