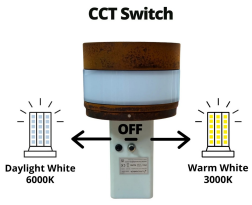
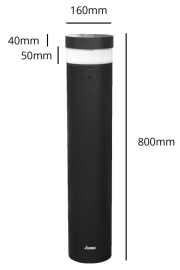
Pro Solar Litecharga Corten Steel Illuminated Bollard

PRO SOLAR LITECHARGA CORTEN STEEL ILLUMINATED BOLLARD

Product Code: Pro Solar Litecharga





Dots

PRODUCT DESCRIPTION

The Litecharga Corten Steel Solar Bollard Light has a rust-like finish. It will automatically illuminate at dusk for up to 14 hours, following a gradual dimming sequence throughout the night (from 100% to 30% brightness) across the first 5 hour period. This results in prolonged battery retention. Surface mount via the internal mounting base or use J-Bolts to root fix into wet concrete.

Please note, if located very close to the coast, this may affect the finish of the bollard.

SPECIFICATIONS

Height	800mm
Diameter	160mm
Fixing	Root Fixed
Material	Corten Steel
