Manchester Flexible PU Bollard

MANCHESTER FLEXIBLE PU BOLLARD

Product Code: SFD5156FLEX

Dots

PRODUCT DESCRIPTION

A breakthrough in cast polyurethane Bollard technology has led to the launch of the innovative Flexible Manchester Bollard. Manufactured in Terrathane which is a fully pigmented, self finished, high impact resistant, zero maintenance black polyurethane. This Flexible Manchester Bollard is designed to be used primarily in areas which frequently get knocked by vehicles at low speed.

These bollards help with reducing impact damage to the vehicle and removing the need for bollard replacement. We also do a removable version of this which are very popular because when they have been hit (and I mean when not if!) then the bollard absorbs the impact and the socket is undamaged. This means that you do not have to go back to attend to either a damaged bollard or damaged socket.

SPECIFICATIONS

Length	1300mm
Diameter	187mm
Fixing	Root Fixed
Material	Polyurethane
Colour	Black
