Tristar Aluminium Path Light

TRISTAR ALUMINIUM PATH LIGHT

Product Code: SFD586

Dots

PRODUCT DESCRIPTION

The Tristar is a three-sided modern LED path light crafted from sturdy aluminium with a smart charcoal grey powder coated finish and available in two different heights. This bollard light has a 5w LED GX53 bulb already installed which is protected by an opal diffuser at the top of the bollard. Each GX53 bulb contains 21 x high quality SMD LEDs that emit an impressive light, and is fully replaceable, unlike other similar lights on the market. Unique LED path lighting effects are created by the Tristar once installed, enhanced by the architectural design of the bollard head, with space in between the diffuser and the flat, top part of the main bollard body. A root mount kit is supplied for secure installation as well as 3m of Cable.

SPECIFICATIONS
