Cyclamen Timber Planter

CYCLAMEN TIMBER PLANTER

Product Code: SFD619

Dots

PRODUCT DESCRIPTION

The Cyclamen Timber Planter is a magnificent cylindrical planter made from Glass Reinforced Plastic (GRP) which is then clad in hardwood. Choose from a wide variety of hardwoods, sustainably sourced (FSC) certified, to complete the look (contact us to discuss options). The choice of hardwood timber includes Sapele, Iroko, Cumaru and Western Red Cedar. Other timbers can be sourced. Each planter is handmade to order once the timber has been specified.

The Cyclamen Planter can be made in a variety of sizes and is a great piece of street furniture or perfect for the larger garden.

The Cyclamen planter is made at 1000mm diameter as standard but can also be made at 1200mm diameter if requested.

Heights of the planter start at 400mm high and with a 1000mm diameter the height can go up to 1200mm high. With a diameter of 1200mm the height can go up to 1000mm

The hardwood for the planter can be oiled, stained or lacquered. We would recommend oil for exterior planters and fire retardant lacquer for interior projects.

SPECIFICATIONS

Height	600mm
Diameter	1000mm
Fixing	Surface Mounted
Material	Timber
Colour	Galvanised
