Stainless Steel Door Barrier

STAINLESS STEEL DOOR BARRIER

Product Code: SFD626

Dots

PRODUCT DESCRIPTION

Stainless Steel Door Barriers are an essential addition to any industrial complex where the door opens on a busy thoroughfare.

For an automatic swing door to comply with the guidelines set out in EN16005 every door must have barrier rails protecting the side approach.

A stainless steel door barrier with a rubber bung offers a combination of strength, durability, security, and aesthetic appeal, making it a reliable choice for various door protection needs and meets EN16005 Guidelines.

Available in two variants:

- Slimline barrier with double tap rail (high and low)(pictured)
- Wide barrier with single low tap rail
  Dimensions:
    - Slimline barrier - H1300mm x W450mm x D42mm
    - Wide barrier - H1300mm x W800m x D48mm
