City Bicycle Rack HYBRID

CITY BICYCLE RACK HYBRID

Product Code: SFD962

Dots

PRODUCT DESCRIPTION

The CITY Bicycle Rack HYBRID is manufactured from hot-dip galvanised steel offering a long service life. The 18mm tubular wheel guides will accommodate 64mm wide tyres and the additional support hoops have a red protective coating. The support hoops help to prevent stored bicycles from being pushed over which can cause damage to the bicycle's wheel and also have an integral eyelet for the attachment of anti-theft systems.

The staggered wheel guides help to save the width required for parking bikes. Approx. 1,850mm parking space depth required.

Supplied in knock-down form, all assembly materials and instructions are included in the box.

- Support hoops help to keep bicycles upright
- Hot-Dip Galvanised for long service life
- Quick and easy to install
- Up to 64mm tyre width
- Single sided parking
- Can be bolted together to create multiple parking combinations
