Oxford Stinger Anchor and Chain Lock

OXFORD STINGER ANCHOR AND CHAIN LOCK

Product Code: Oxford Stinger Anchor and Chain Lock

Dots

PRODUCT DESCRIPTION

The Stinger anchor and chain lock is a complete security solution.

Bike thefts from people's homes, either from a driveway or from inside a garage or shed, can be thwarted by anchoring bikes to an immovable object, which is precisely what the Stinger provides. When fitted to a concrete floor or wall, the Stinger combines a lock, anchor and chain into one slim-line functional unit. The internal lock secures both ends of the removable 10mm chain that is able to withstand sustained attacks and has been awarded a Sold Secure Pedal Cycle Bronze.

This lock has a key replacement service. When you buy your lock, simply note down the number which comes either attached to the keys on a metal tag or is laser marked on each key. Keep this in a safe place, then in the event that you are unfortunate enough to lose all your keys, it will be possible to get a new key made up for you.
